Introducing Safer Internet Day 2024

Safer Internet Day is celebrated globally in February each year to promote the safe and positive use of digital technology for children and young people, and to inspire a national conversation about using technology responsibly, respectfully, critically, and creatively. Safer Internet Day 2024 is on 6th February. In the UK, Safer Internet Day is organised by the UK Safer Internet Centre (UKSIC), a partnership of three charities – Childnet International, the Internet Watch Foundation (IWF) and SWGfL.

This year the campaign will be focusing on change online, this includes covering:

- Young people's perspective on new and emerging technology
- Using the internet to make change for the better
- The changes young people want to see online
- The things that can influence and change the way young people think, feel and act online and offline

NEWSLETTER

FEBRUARY 2024

WHAT IS MENTAL HEALTH?

Mental health includes our emotional, psychological and social well-being. It affects how we think, feel and act. It also helps determine how we handle stress, relate to others and make choices. Mental health is important at every stage of life, from childhood and adolescence through to adulthood.

Did you know?

One in **five** children aged 5 to 16 were identified as having a probable mental health disorder in 2023. That's **6** children in every classroom!

SIGNS TO LOOK OUT FOR

There are lots of different ways that poor mental health in young people can present.

This includes;

- Crying more than usual or persistent sadness
- Disrupted sleep patterns
- Difficulty in concentrating
- Losing interest in friends and other things they like doing
- Being reluctant to talk
- Irritability and aggression, particularly if this includes unprompted outbursts.
- Changes in appetite or rapid weight loss or weight gain.
